

Technological Directory - Graduate School and Faculty of Robotics and Design (2020)

Department of Design and Architecture

Discipline	Field	Expertise	Keyword 1	Keyword 2	Keyword 3	Open to consultations on	Lab	Researcher	Related researchers
Engineering	Architecture	City planning, architectural planning	Urban and regional planning	Planning theory	Design theory	Spatial design to enhance urban amenities and legibility	Digital Design Lab	Kouji NISHIO, Associate Professor	
Engineering	Design	Visual communication design, editorial design	Design history, design theory	Plan editing	Curation	Printing, visual design, visual planning and related areas/fine art and design exhibitions and related fields	Visual Design Lab	Miki IMAI, Professor	
Engineering	Architecture	Architectural design and planning	Architectural design	Architectural planning	Architectural history	Architectural design and planning, architectural design method, design process by modern architect	Architectural Design Lab	Kazunori FUKUHARA, Professor	
Engineering	Architecture	City planning, Architectural design and planning	Architectural design	Design theory	Historical Renovation	Architectural design, city planning, passive design, renovation, historical preservation, communication design for public space, Public Art. Stage design	Living Space Design, Art and Architecture Lab	Yumi KORI, Professor	
Engineering	Design	UX design and Product design	UX design	Interface design	Product design	UX design for industrial products, interface design for information equipment, product design for information and audio equipment	UX Design Lab	Ryo MASUOKA, Professor	
Engineering	Design	Interior Design	Interior Planning	Interior Design Theory	Design Thinking	Interior & furniture design and planning, commercial space and housing space, public space	Interior Design Lab	Youichi OISHI, Professor	
Engineering	Design	Product design	Design	Lighting planning	kansei	Product planning, product design, light fixture design and lighting planning (primarily for homes)	Product Design Lab	Ai AKAI, Associate Professor	
Engineering	Architecture	Architectural planning, Theory of architecture	Architectural planning	Theory of architecture	Modern architecture	Methodology in architectural planning and designing, thoughts and works of modern architecture	Architectural Planning Lab	Yoshitsuna KUTSUKI, Associate Professor	
Engineering	Architecture	Building Construction/materials	Steel structure	Structural analysis	Structural design	Earthquake resistance of steel structures and related topics / Productive system of small scale steel buildings and related topics	Structural Design Lab	Seiichi SHIRAGA, Associate Professor	
Engineering	Architecture	Architectural history and design	Architectural history	Urban history	Environmental formation history	Historical and architectural appraisal of historical structures/determining the historical importance of groups of traditional structures/restoration of historical structures and cities (with CG, etc.) and the presentation of completed structures	Architectural History and Culture Lab	Noritsugu TSUMAKI, Associate Professor
