

Research Topic	Townscape formation of Nakasendo's	Graduate School of Engineering
Host University	Tsinghua University/ Beijing /China	Architecture, Civil Engineering and Urban Design
Duration	From September 19 to October 16, 2019	UDA Masahito

Summary of the Research Activities

I am studying the townscape formation of Nakasendo's town. The current townscape was a phenomenon that formed by adding buildings along the road. My research is to show that it is influenced by human's awareness of the townscape. This phenomenon was found some Nakasendo's town. I could proved by my research . Then ,I think that if humans have different consciousness of cityscape, the townscape formation will be different . I found that it seems same type building in china. So I compared Nakasendo's town with china. And I conducted actual survey and interview. I was helped my friend when I interview.

Actual survey and interview in china.

Comprare Nakasendo's town with china.

College Life, Friends and Others

I took part in Internship. They are a member of architecture office in china. I made up 3D models with them. They kindly helped me when I confused my work. Thanks for them.

指導教員講評

清華大学の都市計画研究室のゼミに参加し、また中国一の設計事務所研修することができ、短期間であったが充実した有意義な留学であったと思われる。
 指導教員氏名：岡山敏哉
